

Phase 10: Final Presentation & Demo Day

AgriConnect

Salesforce-Based Farmer Support & Marketplace System

In this phase, I am preparing and delivering the final presentation of the **AgriConnect project**. I am showcasing the work completed in all previous phases, demonstrating the system, and ensuring proper handoff for future use. I am also creating visibility for the project on professional platforms like LinkedIn and my portfolio.

Step 1: Pitch Presentation

- I am preparing a pitch deck with around 6–8 slides.
- I am starting with the problem statement faced by farmers and marketplaces.
- I am presenting the solution (AgriConnect) and its benefits.
- I am including the features like Crop Listings, Orders, Consultations, Knowledge Base, and Dashboards.
- I am adding a slide on the technology stack (Salesforce, Lightning, Apex, etc.).
- I am explaining the value proposition for farmers, admins, and stakeholders.
- I am designing the slides with clear visuals, icons, and charts.
- I am practicing the pitch to ensure confidence and time management.
 - Insert image: Screenshot of my pitch deck slide

Step 2: Demo Walkthrough

- I am creating a demo script to maintain flow during the live demo.
- I am starting the demo with the login and home page of AgriConnect.
- I am showing Crop Listings with farmer details.
- I am walking through the Orders module to display purchase and delivery tracking.
- I am demonstrating the Consultation feature for farmer support.
- I am showcasing the Knowledge section with resources for farmers.
- I am navigating to the Marketplace module and explaining demand/supply.
- I am presenting the Reports and Dashboards created for analytics.
- I am highlighting Dynamic Dashboards to show user-based data.
- I am closing the demo with the value AgriConnect provides.
 - Insert image: Screenshot of demo screen (Crop Listings / Dashboard)

Step 3: Handoff Documentation

- I am compiling a **comprehensive document** covering all project phases (1–9).
- I am writing a **setup guide** with instructions to deploy the system.
- I am preparing a **user guide** for farmers and marketplace users.
- I am creating an **admin guide** for managing records, reports, and dashboards.
- I am including **screenshots** of important configurations and steps.
- I am documenting **security features** like FLS, Sharing, and Audit Trail.
- I am providing **troubleshooting steps** for common issues.
- I am adding a **table of contents** for easy navigation.
- I am formatting the documentation to look **professional and well-structured**.
- I am preparing the final PDF/Word version for **handoff to stakeholders**.
 - Insert image: Screenshot of documentation TOC or sample page

AgriConnect

Salesforce-Based Farmer Support & Marketplace System

Problem Statement

Farmers in India face multiple challenges such as lack of direct access to buyers, limited awareness of government schemes, difficulties in applying for subsidies, and inefficient communication with agricultural officers. Currently, most of these processes are managed manually through local markets, paperwork, and scattered digital tools, which are inefficient, error-prone, and non-transparent.

As agriculture continues to scale with increasing demand, this fragmented system makes it difficult for farmers to get fair prices, for buyers to reliably source crops, and for government officers to track subsidy distribution effectively.

To overcome these challenges, a **Salesforce CRM solution (AgriConnect)** is proposed to centralize farmer data, enable direct buyer-seller connections, automate scheme applications, and provide real-time support services.

Step 4: LinkedIn/Portfolio Project Showcase

- I am drafting a **LinkedIn post** that explains AgriConnect in simple terms.
- I am writing about the **problem solved** and the **impact of the project**.

- I am highlighting my **role and contributions** (design, reports, dashboards, security).
- I am attaching **screenshots of the UI and dashboards** to the post.
- I am sharing my **learnings and skills gained** through this project.
- I am adding the project to my **LinkedIn Projects section**.
- I am uploading the project details and documentation to my **GitHub repository**.
- I am updating my **portfolio website** with a new section for AgriConnect.
- I am preparing a **demo video link** (if available) to showcase functionality.
- I am sharing the post with **peers, mentors, and recruiters** for visibility.
